

Take Back Program

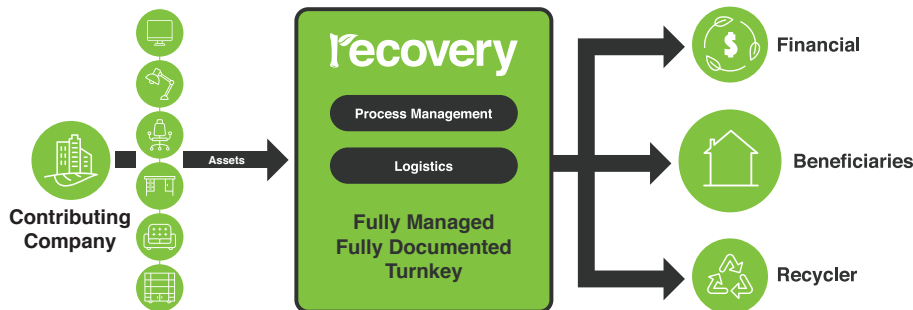

symmetry®

Symmetry offers the Take Back program to minimize product waste and make environmental responsibility easy for our customers. Our dedication to green processes begins with smart manufacturing and continues through every stage of our product's lifecycle. During manufacturing, we maximize material usage and minimize our waste.

But our commitment to green production doesn't end there. We are conscientious about waste at the end of our product's life as well. Symmetry has partnered with a social global company, CSR Eco Solutions, to offer a recovery program for surplus or end-of-life product – regardless of condition.

When products are nearing or reach the end of their life cycle, CSR Eco Solutions steps in to promote a zero-percent waste alternative with their three-stage Take Back program:

- First, they will evaluate the condition of every item and attempt to resell them through discount and liquidation opportunities.
- Products that remain – and are in safe, usable condition – will be given to IRS-approved healthcare facilities, schools, churches, public agencies and more.
- Finally, all remaining products will be recycled or considered for clean, energy-from-waste disposal.

You can learn more by visiting www.csr-eco-solutions.com. To take advantage of the Take Back program, contact Customer Experience at (888) 274-8664 or send an email to exemplis@csr-eco-solutions.com.
